will give better satisfaction. It will also be found to be the best thing ever invented to cover or mend old leaky tip, tar and gravel roofs, or around chimners, scuttles, dormar windows, and gutters, where the tin is rusted through. This Cement can be put on to last as long as stone, and form a perfect adhesion to any object to which it is applied. The Roofs can be painted over (and warranted not to leak) at two dillars and fifty cents oer hondred square feet, which is cheaper and much bet-eir than paint. This Roofing will be found to be the best theug for covering large Roofs where they are exposed to fir —such as Steam Mills, Saw Mills, Factories, Railroad Cars, Bridges, Depots, Station Houses, Steamboat Decks, Cars, Bridges, Depots, Station Houses, Steamoott Decks, and, in fact, every kind of Roof where there is an external exposure from fire. As the Roof is perfect, without a joint in it, it presents no chapte for fire to communicate, and any light substance will burn out without igniting.

The Insurance Offices at Cincinnati, and other places where Childs & Co.'s Genent has been used, insure Build ings with Roofs covered with this Cement, at the same rates as for those covered with Iron, Copper or Tin. The Cement will be furnished to those at a distance

I was an eye wither sof a severe trial of one of these Roofs from a large volume of flame from an adjoining building, which struck directly upon the roof and cornice for nearly half an hoar.
